PROFESSIONAL SUMMARY:

Detail-oriented Frontend Developer with experience in HTML5, CSS3, JavaScript, and React.js. Knowledgeable in building web applications and integrating with RESTful APIs. Passionate about writing clean, accessible code and eager to continue developing technical skills in a collaborative environment

WORK EXPERIENCE:

Web Developer – INTERN

PDO DAICU (Planning and Development Office, Data Analytics Interconnectivity Unit)
January 2025 – May 2025

- Refactored legacy code (1,000+ lines) from a monolithic structure into reusable React components, applying component-based architecture and best practices to improve modularity and maintainability
- Integrated frontend application with backend RESTful APIs, handling data fetching and error management

RELEVANT PROJECTS:

PMES (Performance Monitoring and Evaluation System)

DAICU Web Development Project | January 2024 – May 2024

- Migrated and refactored legacy code into a new repository using modern React component practices. Optimized redundant code by developing reusable components, improving performance and maintainability of the web application.

[Blog Preview Card](#) | [Live Demo](#)

Frontend Mentor Challenge | Frontend Mentor

- Recreated a blog preview card based on a Figma design using HTML5 and CSS3, improving my understanding of semantic HTML structure and element nesting

[Recipe Page](#) | [Live Demo](#)

Frontend Mentor Challenge | Frontend Mentor

- Applied Google Fonts and followed a consistent style guide for layout and design, improving my skills in adjusting spacing (padding, margins) and organizing clean, accessible code.

EDUCATION:

Bachelor in Industrial Technology Major in Computer Technology
2021 – 2025 | Bulacan State University

SKILLS:
